

Slice: a unicorn neobank serving 12 million users

Fintech for GenZ & millennials

Given 300K+ followers on social media and 10M+ mobile app downloads, 10-100s scams target customers of Slice daily on platforms like Instagram, YouTube and Google Play.

Cut 80% scams in three months

Slice fraud and cyber teams do daily monitoring to find scams on social media, app stores and the dark web. Eydle's visual analysis technology helps them find 50% more scams with near-zero false positives.

Expedite takedowns

Eydle shares best practices with Slice teams on how to file takedown reports. This helps Slice increase the takedown success rate. Eydle's partnerships with social media companies help expedite takedowns.

Improve KYC process

Eydle extracts scam intelligence such as fraudulent phone numbers and email addresses from scams. The Slice fraud team uses it to reject fraudulent customer applications and improve KYC process.

Block leaked cards

Using the Eydle platform, Slice fraud team finds customer cards leaked on the dark web. Slice proactively blocks those cards to protect customers from fraud.

Prevent data breaches

Slice cyber team monitors the dark and deep web for stolen employee credentials such as passwords and takes action before bad actors infiltrate and breach Slice systems.
